

Quicker measurement with  
3D Auto Alignment Function

### 3D Auto Alignment Function maintains proper alignment with the patient

3D Auto Alignment feature maintains XYZ alignment even during small eye movements, providing consistent and repeatable measurements.\* An operator follows the alignment guidance on the control panel for initial alignment, and then alignment and measurement start automatically. 3D Auto Alignment function supports easy operation.

\* Manual alignment may be required for patients with poor fixation.

# KR-800A

## Auto Kerato-Refractometer

**TOPCON**

YOUR VISION. OUR FOCUS.

# Workflow Efficiency with the 3D Auto Alignment

## More efficient operation and workflow

TOPCON has significant experience in designing and producing high quality kerato refractometers. For a greater customer experience, we are proud to introduce our new KR-800A with 3D auto alignment function. KR-800A offers enhanced efficiency and easier operation to improve day to day examination workflow in a practice.

## KR-800A

Auto Kerato-Refractometer

- » 3D Auto Alignment function allows quicker and easier measurement
- » Smooth operation
- » 8.5 inch wide touchscreen control panel
- » Compact designed body
- » Easy set-up with a LAN network

### Unparalleled Accuracy

The unique\* Rotary Prism Technology, exclusive to TOPCON, allows unparalleled precision and reliability. This system measures a wider area of the retina while permitting measurements through pupils as small as 2 mm in diameter.

\*The off-centered ring target can cover areas that may be occluded by a small pupil. The angle of the prism enables a wider area of the retina to be measured.

### 8.5 inch Wide Touchscreen Control Panel

The KR-800A is equipped with a wide 8.5 inch color touchscreen panel featuring clear, easy to read icons allowing the operator full control of the unit from a single screen during the measuring process.

### Easy Adjustment of Touchscreen control of Chinrest

Up/down adjustment of chinrest is easily operated with the icons on the touchscreen's control panel.

### Fog

To control accommodate, the fog may be adjusted from the screen. This is very helpful for use with young children.

### Cataract mode

The cataract mode supports improved success rate to measure eyes with cataract.

### Alignment mode

**"A" (Semi Auto Mode)**  
Once pupil is roughly aligned, fine focus and measurement are performed automatically.

**"AS" (Auto Shoot Mode)**  
Once the manual alignment is complete, the measurement is taken automatically.

**"M" (Manual Mode)**  
All processes are performed manually.

### One Touch Lock

The one touch lock supports a quick switch to lock the body.

### Easy to Load Printer

The KR-800A is equipped with a built-in thermal printer that can be easily loaded with a roll of paper.

- 1 Operation ID
- 2 Refraction measurement data (right eye)
- 3 Refraction measurement data (left eye)
- 4 Keratometry measurement data (right eye)
- 5 Keratometry measurement data (left eye)
